

## Redgate Community Circle SSRS Class Week 2 Assignment

Create a new project for Week 2. Be sure to set up shared data sources and embedded datasets. Add formatting and make sure that the report will print properly. At this point, grouping, subtotals, and interactive features are not used – well, unless you want to work ahead!

Do NOT use the report wizard this week.

Create the following reports in the project:

1. A list of the products from AdventureWorks2017.

```
SELECT ProductID, Name, Color, ListPrice
FROM Production.Product
WHERE ListPrice > 0;
```

2. A list of the departments from AdventureWorks2017.

```
SELECT D.DepartmentID, D.Name, D.GroupName
FROM HumanResources.Department AS D;
```

3. A list of stock items from WideWorldImporters.

```
SELECT SI.StockItemID, SI.StockItemName, SI.Size, SI.Brand, SI.LeadTimeDays
FROM Warehouse.StockItems AS SI;
```

4. A list of the colors used at WideWorldImporters.

```
SELECT C.ColorID, C.ColorName
FROM Warehouse.Colors AS C
```
